

Risk Management in Complex Environments

Launching the IRM Journey across the BeLux region

An IRM Belgium and Luxembourg Regional Group event

Tuesday 25th June 2019, 18.00

BDO Brussels Airport | The Corporate Village, Da Vincilaan 9
1930 Zaventem, Belgium

Over the last 10 years, from banking to construction sectors, companies have significantly changed the way they deal with complex projects and subsequent risks. This first event will be the opportunity to get some insights from our guest speakers on how risk management is actually deployed in complex yet different environments, and what are the challenges ahead.

Since it is our first event in the BeLux region, it will also be the opportunity to introduce you to the Institute of Risk Management and to the mission of our regional group.

Agenda

- 18:00 - 18:30** Arrival and Registration
- 18:30 - 19:00** Welcome and Introduction by David Lannoy, Kenneth Willems (IRM BeLux) and Clive Thompson (IRM)
- 19:00 - 19:30** Session 1: *Opportunity & Risk Management in the Construction Sector – Adding value at project and corporate level*, by Kenneth Willems and Gaëtan Auvray
In this session, our guest speakers will give you some insights on how contractors in Belgium are managing risks and opportunities and what are the drivers in this process that are specific to the construction industry.
- 19:30 - 20:00** Session 2: *Risk Management in an Agile environment – Insights from the Banking Sector*, by Kaevin Rombaut
Our guest speaker will in this session give you a short introduction to Agile and the challenges it poses to Risk Management functions from a first as well as second line perspective. He will present the attention points and possibilities for implementation.
- 20:00 - 22:00** Get together for a drink and share thoughts and ideas about Risk Management

Our guest speakers

Opportunity & Risk Management in the Construction Sector – Adding value at project and corporate level

Kenneth Willems is active in risk management and project management since 2005, with experience acquired in managerial functions across Europe, the Middle East and Latin America. He is currently Head of Corporate Risk department in DEME Group and also acts as an expert in several international infrastructure and risk management organizations. Kenneth is a Civil Engineer and holds a MBA from the Manchester Business School.

Gaëtan Auvray is working since 2009 for the general contractor BESIX in project functions as well as support department functions. For the last two years, as Risk Process Manager, he has been structuring and harmonizing the Risk Management approach on projects. He holds a Master in Electromechanical engineering from the Université Catholique de Louvain as well as a Master in Management from the Solvay Brussels School of Economics and Management.

Risk Management in an Agile Environment – Insights from the Banking Sector

Kaevin Rombaut has over 14 years of experience in Audit, Operational & Information Risk Management and initiated the design of Agile Operational Risk Management in a major financial institution in Belgium. He is a Certified Internal Auditor (CIA) and Certified Information Systems Auditor (CISA) specialised in processes within financial services organisations.
